

Do you have a child with Sensory Processing Disorder?

(also referred to as Sensory Integration Dysfunction)

Are you a professional or community member?

(interested in learning more and/or sharing information about SPD)

Cincy SPD- Parent Connections Support Group

SPD Parent Connections is a grassroots organization created by and for parents to provide information, resources and understanding to parents, friends, relatives, community members, professionals and anyone touched by the impact of Sensory Processing Disorder.

Networking is provided through information exchange, story sharing, guest speakers & group discussion.

This group is run by parents. Parents share their personal experiences related to SPD. All comments or advice are the opinions of those parents and are not recommendations. Advice of a medical and/or allied health professional should be sought for diagnosis and treatment.
