# camp Odakota

Odakota is Sioux for "friend" and Camp OdakOTa is the place to make new friends. Our camp is designed to provide the support needed to help children with sensory processing disorders develop meaningful relationships. Some children avoid sensory input while others crave it. Because the camp was conceived and developed by occupational therapists, the staff of Camp OdakOTa understands this and will be sensitive to your child's particular sensory needs.

*sense the  
difference*

## *Sensory Friendly*

### Why do summer camp with COTI?

COTI is Cincinnati's expert in the area of sensory integration. The camp curriculum has been designed by COTI staff and will anticipate and meet the sensory and environmental needs of our campers to promote their successful participation in summer camp. Children will become a part of a small group of 4-6 children and participate in occupational therapist-led activities throughout each day.

## Who is an OdakOTa Kid?

Camp OdakOTa is for children who are 6-10 years old and who have sensory processing disorder or have symptoms of sensory processing disorder due to other conditions. Due to the set-up of the camp, we are unable to provide support for children who require 1-on-1 supervision.

Free screenings will be completed for all campers during the spring to ensure that Camp OdakOTa is right for them. If the therapist performing the screening does not recommend camp for your child, your deposit will be returned.

Please call if you have questions about enrollment criteria.
